ALLOS[®] GRANULES

CORTICAL & CANCELLOUS PARTICULATES

Engineered to provide the best of both worlds

Allos[®] Granules are biocompatible allograft granules made from cancellous and/or cortical bone, most commonly used for spinal fusion, void filling and sinus augmentation. They provide an optimal osteoconductive scaffold with osteoinductive growth factors that promote cellular ingrowth and rapid incorporation. Allos[®] Granules exhibit excellent handling characteristics when mixed with saline, blood or bone marrow aspirate.

ALLOS[®] Macro | CANCELLOUS PARTICULATES

Part Number	Description
-------------	-------------

BNECM05	Cancellous Morselized 05cc (1–4mm)
BNECM15	Cancellous Morselized 15cc (1–4mm)
BNECM30	Cancellous Morselized 30cc (1–4mm)
BNECC05	Cancellous Crushed 05cc (4–10mm)
BNECC15	Cancellous Crushed 15cc (4–10mm)
BNECC30	Cancellous Crushed 30cc (4–10mm)

ALLOS[®] Macro | CORTICAL PARTICULATES

Part Number	Description
-------------	-------------

BNECCM05	Cortical Cancellous Morselized 05cc (1-4mm)
BNECCM15	Cortical Cancellous Morselized 15cc (1-4mm)
BNECCM30	Cortical Cancellous Morselized 30cc (1-4mm)
