# ALLOS<sup>®</sup> MC5

## CERVICAL ALLOGRAFT SPACER

### Restore height and lordosis with strength and confidence

The Allos<sup>®</sup> MC5 is a cervical spacer that is precision-machined from femoral shaft allograft bone. With anti-migration ribs and a wide footprint, this graft maximizes disc space coverage, while providing a central graft window for packing additional bone graft material such as Nevos<sup>®</sup> demineralized bone matrix or Orios<sup>®</sup> cellular allogeneic bone scaffold. The MC5 graft interfaces with inserters SP-0389 (14x11 footprint) or SP-0495 (15.5x13.5 XL footprint) for easy graft placement and is packed in saline to prevent graft fracture during insertion.

#### The Allos<sup>®</sup> MC5 features

- Solid, precision-machined cortical bone
- 2 footprints: 14x11mm and XL 15.5x13.5mm
- Inserter grooves and mating inserter
- 5-10mm heights, in 1mm increments (*measured from anterior side*)
- 5° of lordosis
- Large central graft window for addition of bone graft material
- Anti-migration ribs
- Ambient temperature storage
