ALLOS[®] CC7

PREMIUM ASSEMBLED STRUCTURAL ALLOGRAFT

Engineered to provide the best of both worlds

The Allos[®] CC7 is a premium assembled structural allograft that combines the benefits of both cortical and cancellous bone. Cortical planks provide the graft with structural integrity and the dense cancellous center serves as an optimal scaffold for bony in-growth. Offered in 2 footprints, 7 heights and 7 degrees of lordosis, the CC7 is designed to accommodate a variety of patient anatomies. The CC7 graft interfaces with inserters SP-0397 (14.5x11.5mm footprint) or SP-0494 (15.5x13.5mm XL footprint) for easy graft placement and is packed in saline to prevent graft fracture during insertion.

The Allos[®] CC7 features

- Solid, precision-machined cortical planks and a dense cancellous center held together by cortical bone dowels
- 2 footprints: 14x11mm and XL 15.5x13.5mm
- 6-12mm heights, in 1mm increments
- 7° of lordosis (*measured from anterior side*)
- Grasping inserter
- Anti-migration ribs
- Ambient temperature storage
