

# TeleGraft®

## MIS Graft Delivery System

An **MIS Ultra®** Solution

Multidirectional Control System.  
Single Tissue Pass.

# TeleGraft® | MIS Graft Delivery System

## Enhanced Graft Placement and Precision

- Multi-directional graft delivery tube allowing precise and controlled graft delivery
- Scooped Distal Tip for controlled graft placement
- Compatible for various spine fusion application, including TLIF, PLIF, and extraforaminal procedures

- Lightly radiopaque MIS Delivery Tube allows for easy visualization under fluoroscopy imaging

# TeleGraft® | MIS Graft Delivery System

## MIS Graft Delivery Made Simple

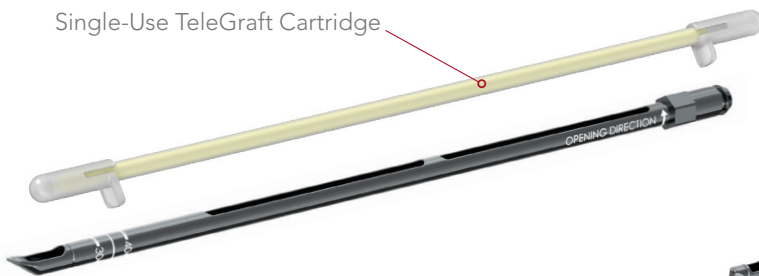

- Minimally disruptive single-pass technique, designed to maximize the visibility of the surgical site
- Re-loadable graft content using a patented break-action delivery handle system
- Single-handed ratcheting handle delivers graft with only a few squeezes

- Suitable for use with either pre-filled Fiber Putty TeleGraft cartridges or custom, manually filled auxiliary Delivery Tubes

Single-Use TeleGraft Cartridge

Auxiliary Delivery Tube for autograft and/or other bone grafts

## System Components
